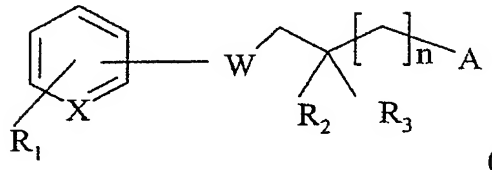
CLAIMS

1. Compound of formula (I):



(I)

in which

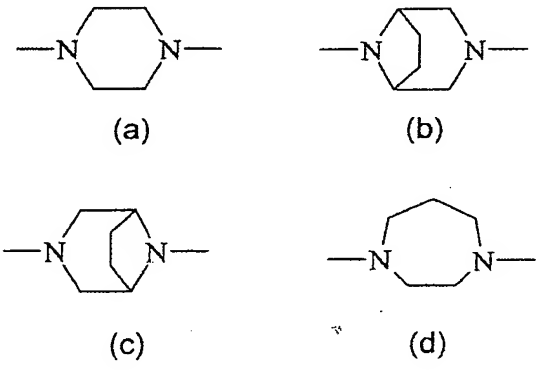
X represents N or CH;

R_1 represents a hydrogen or halogen atom or a CF_3 group;

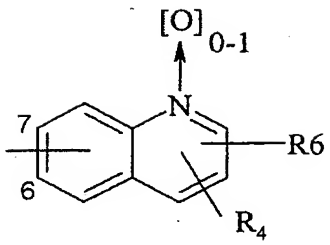
R_2 and R_3 independently represent a hydrogen atom or a methyl group;

n is 0 or 1;

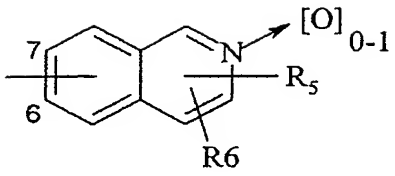
W represents a diazoheterocycle of formula (a) to (d)



A represents a group of formula (e) or (f)



(e)



(f)

where

R_4 represents a hydrogen or halogen atom, a (C_1-C_4)alkyl group, a CF_3 group, an amino, a mono(C_1-C_4)alkylamino or a di(C_1-C_4)alkylamino group;

R_5 represents a hydrogen or halogen atom, a (C_1-C_4)alkoxy group, a (C_1-C_4)alkyl group or a CF_3 group;

R_6 represents a hydrogen atom, a (C_1-C_4)alkyl group or a (C_1-C_4)alkoxy group;

it being possible for only one or both of the atoms of the rings (a) to (d) to be oxidized;

and their salts or solvates.

2. Compound according to Claim 1, where n is zero.

3. Compound according to Claim 1 or 2, where R_2 and R_3 are each a hydrogen atom.

4. Compound according to Claim 1 or 2, where R_1 is a CF_3 group.

5. Compound according to Claim 1 or 2, where R_1 is a fluorine or chlorine atom.

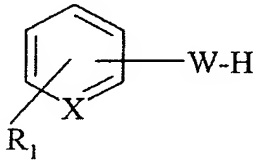
6. Compound according to Claims 1 to 3, where X is CH and R_1 is at the 3-position of the benzene.

7. Compound according to Claims 1 to 3, where X is CH and R_1 is at the 2-position of the benzene.

8. Compound according to Claims 1 to 3, where X is N and the pyridine is substituted at the 2,6-positions.

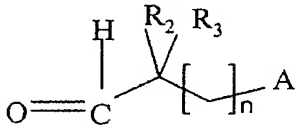
9. Compound according to Claims 1 to 8, chosen from its mono-N-oxide derivatives, its bis-N-oxides and its tri-N-oxides.

10. Method for preparing the compound of Claim 1, characterized in that there are carried out a condensation/reduction reaction of a compound of formula (II):



(II)

in which X, W and R_1 are as defined in Claim 1, with an aldehyde of formula (III):

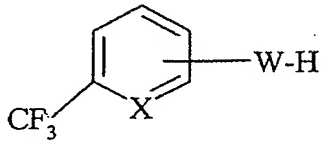


(III)

in which R_2, R_3, n and A are as defined above, the isolation of the compound of formula (I) and the

optional conversion to one of its salts or solvates or to its N-oxide derivatives.

11. Compound of formula (II')



(II')

in which W represents a group of formula (b) or (c) according to Claim 1, and its salts or solvates.

12. Pharmaceutical composition containing, as active ingredient, a compound of formula (I) according to Claims 1 to 9 or one of its pharmaceutically acceptable salts or solvates.

13. Composition according to Claim 12, characterized in that it contains from 0.001 to 100 mg of active ingredient.

14. Use of a compound of formula (I) according to Claims 1 to 9 or of one of its pharmaceutically acceptable salts or solvates for the preparation of analgesic medicaments and/or intended for the treatment of diseases linked to immune and inflammatory disorders.

15. Medicament comprising, as active ingredient, a compound of formula (I) according to Claims 1 to 9 or one of its pharmaceutically acceptable salts or solvates.
